Appendix B

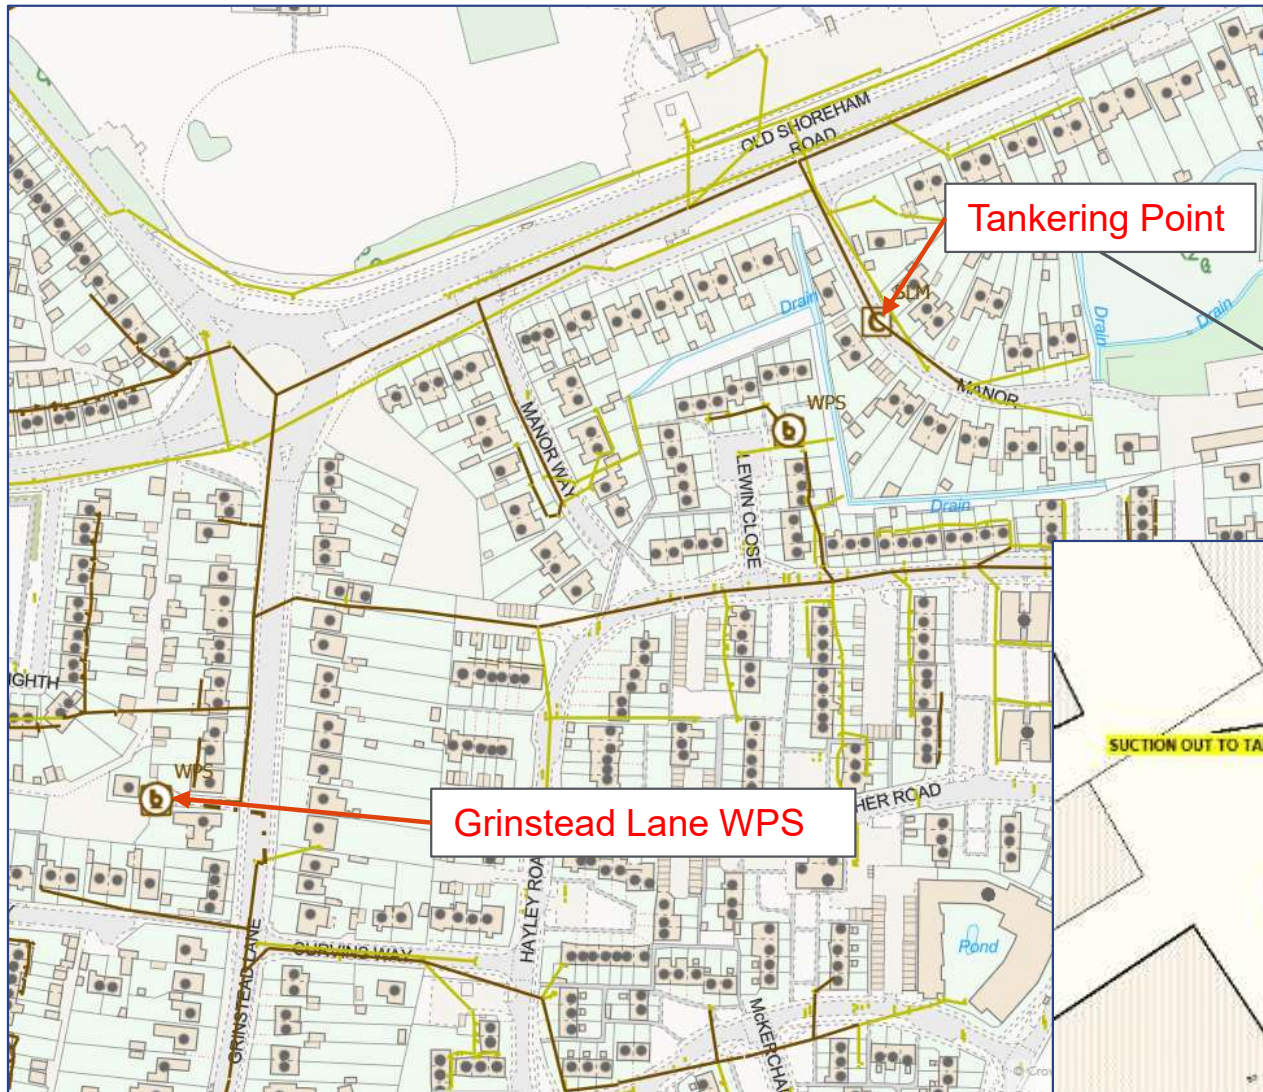

APPENDIX B

Mitigation measures

See notes in Section 4 regarding the potential need to introduce mitigation measures to reduce the risk of groundwater infiltration impacting the level of service provided by the sewerage system. Location of sites will be selected to provide the most effective arrangements to maintain services, whilst minimising environmental effects. Where practical, sites that have been used previously are expected to be re-used (when necessary), but the use of different locations cannot be ruled out, if hydraulic conditions dictate.

Lancing, West Sussex - Tankering Sites

W3W = ///generally.dollars.buggy

Flow extracted from tankering point in Manor Close and taken to Worthing WTW for treatment.

Tankering Point in detail
